## We want things to be clear

If, for any reason, what you are signing up for is unclear, or if you have specific questions about these services, please ask for our help! Our Maintenance program is the best available and we have catered it to the needs of our customer base - which means we know it inside out!

# GUARANTEED

**100% Customer Satisfaction** - we will do whatever it takes to ensure that you get the 5-star service that we guarantee.

**Priority Service** - You and your home will be given priority over others who do not participate in this program

**Agreement is Transferrable** - If you sell your home, the new homeowner will have the option of continuing our services! Who better to continue this process than the ones who are already familiar with it?

**Drain Line Treatment** - Seasonal drain line treatment will assist in the prevention of a costly drain backup.

**Compressor Integrity Test** - We perform an important test on the electrical windings inside your a/c's compressor to ensure that it is performing as it should, and shows no indication of costly, imminent problems.

**Condenser Coil Cleaning** - A water-only wash to remove any debris so that your condenser can remove heat from the house properly and use less electricity to do so.

**Seasonal Tuneup** - A lengthy process where your technician goes over every accessible component with a fine toothed comb and then presents the findings to you so that you are fully informed.

**No Overtime Charges** - No matter the time of day or night, you only pay our normal Business Hour rate for a service call!

**Discounts on Repairs** - Any service performed will be discounted at this rate, no matter the cost, no matter the repair.

**Protection of Manufacturer's Warranty** - We handle checking up on any repairs that may still be under warranty so that you don't have to.

**Multiple System Discounts** - We understand that owning a larger home is expensive, and we want to help out with this cost by giving you 25% off the monthly price of any additional systems you may have for your home!

**One Free Travel/Diagnostic** - During the course of a 12-month period you will have one diagnostic fee waived, which means we'll cover the cost.

**Free 1 lb of refrigerant** - Sometimes there's a small leak, or maybe a system was never charged properly to begin with. This is designed to get you to an optimum level of efficiency without breaking the bank.

**Electronic Leak Search** - If your system is low enough on refrigerant to warrant an inspection for a leak we will do so at no charge to you.

**Lifetime Warranty on Replacement HVAC Parts** - any part we install will be guaranteed for the rest of the life of your system!\*

**Whole House Electrical Safety Inspection** - One of our qualified electricians will perform a full safety inspection of your home to verify that you, your family, and your belongings are safe from any visible electrical hazards.

\*Excludes compressors, refrigerant, and refrigerant circuit components. Warranty covers all parts installed by ComfortPro Solutions under the current Maintenance Agreement term. Maintenance Agreement must remain uninterrupted and active at the time of service for ComfortPro Solutions to fulfill warranty terms. Proper protections - surge protection, fuses, etc. - must be installed in order to satisfy (pending historical verification).
